

Raising the standard of
assistive technology

in the workplace

StarTechnology

Raising the standard of assistive technology in work, education and home environments

StarTechnology uses an exciting range of equipment, software and expertise to provide accessibility solutions for work, education and home environments. Our services are customised to you, and include assessments, equipment, training and support.

Our team can come to your workplace to assess individuals and workspaces. You will receive a report outlining our recommendations, with follow-up support if required.

To find out more, get in touch with Neil Beck, our Assistive Technology Assessor.

We work with small to large employers and the self-employed to deliver:

- Improved IT and phone accessibility
- Training, advice, support and guidance
- A Loan Library, allowing you to try equipment before purchasing
- Adjustments that create inclusive workspaces
- Assistive technology for working from home
- Solutions to meet legal compliance
- Increased productivity and job satisfaction

National Star works with people with disabilities, enabling them to live their lives independently and to the full.

National Star and StarTechnology are working names of National Star Foundation, a charity registered in England and Wales number 220239
